

# Trains of America

Trains of America, Inc., trackless road trains are ideally suited for resorts, cruise terminals, national & state parks, zoos, amusement parks, shuttle services, and much more.

All road trains are designed from the chassis up for optimum operation for small to high density tourist areas, while operating in a quiet and attractive manner.

Configurations can be designed to our customer's requirements as well as custom paint specifications. A train set typically consists of a locomotive, tender, coach, and a caboose which seats 79, or a locomotive, 2 coaches and a caboose, which seats 96.
